### [Magnum Clock](#)

*"I wanted to put a digital pace clock at each end of three pools (6 clocks)... The ones I had seen at other pools are \$1000+ each...that's \$6000+! So, I decided to test a clock I found online from Magnum Clock. I liked it so much I bought three more. My total for four clocks (mounted at each end of both pools) was about the same as buying one of the digital clocks I had seen at other pools."*

- The remote is great! I can make changes and synchronize the clocks in a few seconds.
- The functionality is great (clock, timer, count down, count up)
- I bought the clock with 4" digits they also have 5" (\$359) and 6" (\$399)

## TT4060

(model Hopkins purchased)...

- Large 4-inch LED 6-Digit
- Visible up to 200 feet!
- 27 inches wide x 6 inches tall x 2 inches deep
